Terminal

ROUTER * Win *

The screenshot shows a Windows 7 desktop environment. In the background, a 'Network Connections' window is open, displaying a list of network adapters. In the foreground, an 'Administration Command Prompt' window is open, showing the results of a network test. The command prompt displays the execution of 'nmap.cpl' and a 'ping' command to the IP address 50.0.0.1. The ping results show four successful replies with a 1ms round-trip time and a 255 TTL. The ping statistics indicate 100% success with no packet loss.

C:\Users\user>nmap.cpl

C:\Users\user>ping 50.0.0.1

Pinging 50.0.0.1 with 32 bytes of data:
Reply from 50.0.0.1: bytes=32 time=1ms TTL=255
Reply from 50.0.0.1: bytes=32 time=1ms TTL=255
Reply from 50.0.0.1: bytes=32 time=1ms TTL=255
Reply from 50.0.0.1: bytes=32 time=1ms TTL=255

Ping statistics for 50.0.0.1:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
    Approximate round trip times in milli-seconds:
        Minimum = 1ms, Maximum = 1ms, Average = 1ms
